

Java

```
class Solution {  
    public int[][] insert(int[][] intervals, int[] newInterval) {  
  
    }  
}
```

JavaScript

```
/**  
 * @param {number[][]} intervals  
 * @param {number[]} newInterval  
 * @return {number[][]}  
 */  
var insert = function(intervals, newInterval) {  
  
};
```

C++

```
class Solution {  
public:  
    vector<vector<int>> insert(vector<vector<int>>& intervals, vector<int>& newInterval) {  
  
    }  
};
```
